

### 1、Detach the spool

### 2、Get in place a roll of filaments free of spool

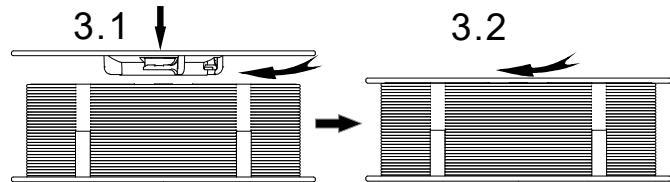

### 3、Put the roll of filaments into the spool

3.1 □ Press the detached part of spool and rotate it clockwise until it is assembled in place

3.2 □ When the detached part of spool is put back , a "click" sound should be heard to indicate two parts are hooked successfully and they will not come loose themselves as it is

### 4、Completed

1、Begin with fixing the head of filament

2、Then untie the binding strap
